

Diego Shirima

Profile

Diego is a survey expert with 12+ years of experience in managing and monitoring electronic data collections. He is deeply familiar with a wide variety of survey types and complex survey designs, such as listing with in-field sampling, multi-instrument institutional surveys or high frequency surveys. His responsibilities often include developing and contextualising questionnaires; scripting and translating CAPI tools; pre-testing and piloting instruments and methodology; conducting field-work training; developing and managing the data quality assurance tools and protocols; as well as contributing to analysis and reports. As a data manager and CAPI expert he has advised and contributed to numerous projects in Africa and the Latin American and Caribbean region.

Professional Experience

2021 to date	rowsquared <i>Associate</i>
2018 to date	MASSA Institute of Social Science Research <i>Head of Research and Data Management</i>
2018-2019	World Bank <i>Short Term Consultant (STC)</i>
2018 - 2020	Decision Bridge Ltd <i>Research Assistant</i>
2017 - date	Survey expert consultant particularly data management Worked for Innovex – 2017, Sistemas Integrales - 2020, Small Arm Survey - 2021
2017	Fern Marketing <i>Data Manager</i>
2016 – date	Oxford Policy Management Ltd <i>Data Manager (External Consultant)</i>
2015 – 2017	Ideas in Action Ltd <i>Data Manager</i>
2015	Focal Point Africa Ltd <i>Data Manager</i>
2011– 2014	Economic Development Initiatives <i>Senior Data Processing Officer</i>
2009 – 2010	Department of Economics, Cornell University <i>Project Coordinator & Supervisor in REAP Project in Tanzania</i>
2007	World Vision Tanzania <i>Research Officer</i>

Education

2020 - 2021	Laval University, Canada Masters in Applied Development Economics
2017 - ongoing	Mzumbe University, Dar es Salaam Campus College, Tanzania Masters of Science in Applied Economics and Business
2008 - 2011	Institute of Accountancy Arusha, Tanzania Advanced Diploma in Accountancy
2007 - 2008	Institute of Accountancy Arusha, Tanzania Certificate in Accounting and Finance

Languages

Swahili (Native), English (Very Good), Chaga (Good)

Countries of Work Experience

Tanzania, Kenya, Uganda, Ethiopia, Bangladesh, Nigeria, Rwanda, Ivory Coast, Liberia, Zimbabwe, Suriname, Barbados, Libya, Niger, Chad, Sudan

Skills and Software

STATA, MS Excel, ODK platforms (ODK, SurveyCTO, KOBO), Survey Solutions, SurveyBe, Power BI, ArcGIS, Google Sheets, Data Collection, Data Quality Control, Dashboards, Maps, Data Process Design, Tableau

Project Experience

Project	Women's Integrated Sexual Health (WISH)
Client	FCDO
Year	2022
Country	Remote
Details	FCDO has contracted OPM to undertake the third-party monitoring (TPM) of one of the largest FCDO's programme in sexual and reproductive health called Women's Integrated Sexual Health (WISH). The aim is to develop a robust evidence base of the impact of sexual and reproductive health interventions in Africa and Asia through independent verification and triangulation of a results, generating additional evidence and learning what works on key issues, and sharing the evidence. OPM is holding the contract with DFID and ITAD is the lead partner for this project.
Role	Research Analyst for the Global Analysis. Leading the analysis of WISH implementing partners' (IPs) data and drafting an analysis report. This includes: <ul style="list-style-type: none">• Reviewing the previous GA reports and the inception report to understand the purpose & objectives of the global analysis• Conducting analysis on WISH Q1 - Q4 2021 data provided by IPs Leading the analysis of WISH implementing partners' (IPs) data and drafting an analysis report.

Project	Evaluation of the Promoting and Enabling Vaccination Efficiently, Now and Tomorrow (PREVENT) Programme
Client	Global Alliance for Livestock Veterinary Medicines (GALVmed) in partnership with Ceva Sante Animale
Year	2022-2023
Country	Tanzania, Nigeria and Ivory Coast
Details	Promoting and Enabling Vaccination Efficiently, Now and Tomorrow (PREVENT) is an ambitious 4-year project that aims to help 150,000 small-scale poultry producers in Africa to become more productive and efficient by building their businesses and overall sustainability. The PREVENT project will see more than 50 million hatchery-vaccinated day-old chicks distributed annually across eight countries in sub-Saharan Africa. PREVENT responds to three key challenges faced by small-scale poultry producers including: (i) low productivity in small-scale poultry production; (ii) inability for small-scale poultry producers to compete with commercial production; and (iii) to address a gender dimension whereby women participate in a disproportionately low share of poultry management activities, particularly as poultry production intensifies.
Role	Data Manager: Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management for in three countries Tanzania.
Project	Independent Verification of Results and Review of the Education Programme for Results II
Client	GPE, KOICA, SIDA, FCDO
Year	2022
Country	Tanzania; Lindi, Mbeya (Mbarali DC), Kagera, Manyara for 2018 verification and other 8 regions from each education zone for 2018 verification.
Details	EPforR II is a government-led programme, guided by the education goals and objectives of the GoT. EPforR II result areas and DLIs are focused on a single framework jointly developed and agreed by all partners. The programme's focus reflects the Government's priorities for improving performance in basic education and areas contributing to sustainable systemic improvements in the education system.
Role	Data Analyst: Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol, data management and data analysis focusing on indicator based on Teacher, Pupil Enrolment, Finance and EMIS data.
Project	Independent animal health impact study and technical M&E support to the Veterinary Innovations Transforming Animal Health and Livelihoods (VITAL) programme
Client	Global Alliance for Livestock Veterinary Medicines (GALVmed)
Year	2021-23
Country	Tanzania
Details	This study assesses the effects of Newcastle Disease Vaccine (NDV) delivery using a randomized controlled trial (RCT). The underlying objective is to address a general paucity that exists of experimental evidence on the post-adoption benefits of preventive and curative animal health products for smallholders. More directly, the goal is to identify the causal effect of NDV on a set of key outcomes of interest,

	related to our Theory of Change (ToC): smallholder poultry productivity, household welfare, livelihoods, income, and agricultural production.
Role	Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol, data management.
Project	Global Alliance for Nutrition (GAIN) - KFMW Workstream 3
Client	Global Alliance for Nutrition (GAIN)
Year	2020-21
Country	Tanzania
Details	GAIN is building on its established relationships with informal markets where nutritious foods are traded and sold in Kenya, Tanzania, Nigeria, Ethiopia, and Bangladesh to strengthen the voice of vendors and consumers in the COVID-19 pandemic response and recovery. This is being done through on the ground surveys with consumers and vendors to assess the physical state, functioning and resilience of markets and market actors under COVID-19
Role	Global Technical Support: Management of five country data, prepare data management protocol, follow-up and provide technical support to DMF, develop and script electronic questionnaire using Kobo
Project	Cross-border Assessment of the Prevention of Violence Extremism
Client	UNDP
Year	2021
Country	Sudan, Libya, Chad, Niger, Nigeria
Details	As part of the fight against Violent Extremism in Libya, the Violent Extremism Prevention Unit at the UNDP Regional Office in Addis Ababa is carrying out a regional survey covering Libya, Sudan, Chad, Nigeria and Niger. This survey called "southern Libya PVE Assessment" or Cross-border Assessment on Violent Extremism in southern Libya will also be conducted in Niger, more specifically in the Agadez region at the Salvador Pass. The investigation will cover very dangerous geographic areas where terrorist groups are actively operating. Regions covered are recognized as an alternative sanctuary for jihadists and also very strategic areas for drug, arms and migrant traffickers.
Role	Survey Expert – Development of electronic questionnaire, design, remote piloting and testing, assist country translations, delivery of enumerator training, technical support, management of field data collection protocols and activities and data management.
Project	Capacity Building of Data Management to Implementing Partners (Training Providers) of Swisscontact-Tanzania
Client	Swisscontact / Swiss Embassy
Year	2020
Country	Tanzania
Details	Assignment aims to provide building data management and analysis capacity to Swisscontact 25 implementing partners based in Morogoro. These implementing partners are supported by SWISSCONTACT in reducing unemployment through provision vocational training skills to youths and women. Unfortunately, most of these implementing partners or training providers lack essential skills of data management and analysis that would help them in their monitoring and

	evaluations.
Role	Facilitator - Co-facilitator of data management training responsible to train on designing of electronic data collection tools using ODK, data quality assurance measures, electronic data management and storage.
Project	COVID19 Phone Survey
Client	IBD
Year	2020
Country	Suriname
Details	The survey was one of the COVID19 response surveys implemented by the IBD aiming at measuring the socioeconomic impact of COVID19. It interviewed a subsample of the Suriname Survey of Living Conditions conducted in 2016. The survey was conducted over the phone by interviewers from their homes, posing a particular challenge to data quality assurance. A quality assurance system was devised that identified and de-incentivised undesired interviewer behaviour.
Role	Assistant Data Manager - instrument review and pre-testing, CAPI set-up, training of field workers and data management.
Project	COVID19 Phone Survey
Client	IBD and Cornell University
Year	2020
Country	Barbados
Details	The survey was one of the COVID19 response surveys implemented by the IBD aiming at measuring the socioeconomic impact of COVID19. It interviewed a subsample of the Living Standard Measurement survey conducted in 2016. Two rounds were fielded in May and November 2020. The surveys was conducted over the phone by interviewers from their homes, posing a particular challenge to data quality assurance. A quality assurance system was devised that identified and de-incentivised undesired interviewer behaviour.
Role	Assistant Data Manager - instrument review and pre-testing, CAPI set-up, training of field workers and data management.
Project	Selection and Impact of Modern Industrial Employment: Evidence from a Field Experiment in Chinese Factory in Tanzania
Client	Collaboration between London School of Economics, Harvard University & University of British Columbia
Year	2019-22
Country	Tanzania
Details	Foreign firms and foreign direct investments are crucial to the development of low-income countries: they stimulate structural transformation from agricultural to industrial production, foster technological transfers, and disseminate advanced managerial practices. A critical element of firms' success is their ability to match with and retain productive workers.
Role	Project and Data Manager - Liaising with client, budgeting and negotiations, Survey design, Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	Impact Evaluation Mentoring for Governments in East and West Africa: Local

Authorities and Property tax collection: Experimental evidence from Tanzania

Client	Partnership for Economic Policy (PEP) and International Development Research Centre (IDRC).
Year	2019-21
Country	Tanzania
Details	Tanzania Revenue Authority is strategizing on the best approach to manage the property tax particularly low-cost mechanisms to increase compliance in collaboration with local government authorities. One of the current strategies is sending message reminders to the property taxpayers about payment. However, there is no evidence of the extent to which this strategy maximizes Property Tax Compliance. The purpose of this project is therefore to establish evidence on the effect of mobile Phone Text Messages Reminders on Property Tax Compliance in Tanzania by using Randomized Control Trials Methodology.
Role	Research Associate - Project design on methodologies to be applied including power calculation for sample size, data mining and verification, preparing survey instruments, follow-up survey and intervention, data analysis, reporting and dissemination of findings.

Microenterprise Investment and Kinship Demands

Client	University of British Colombia
Year	2019-21
Country	Tanzania
Details	The study aims to study the effect of pressure to share income with relatives on investment. Specifically, this experiment provides small firm owners in Tanzania with capital grants, which will allow the researcher to measure their returns to capital. Before giving these grants, each participant was given the choice between receiving some money and having it announced to others, or receiving a different amount in private. This gives the researcher a measure of their kinship request rate, and being able to test whether those who hide also make different investment decisions.
Role	Project and Data Manager - Liaising with client, budgeting and negotiations, Survey design, Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

ANSAF Strategic Plan: Baseline Survey

Client	Agricultural Non-State Actors Forum (ANSAF)
Year	2019
Country	Tanzania
Details	Baseline Survey for its five Years Strategic Plan (2018-2022). The objective is to obtain baseline information to be used in measuring the performance of Strategic Plan during its implementation.
Role	Research Assistant - Review data collection questionnaire, script questionnaire in ODK, field testing, coordinate and provide technical support during training, data cleaning and verification and data analysis.

Mapping of Female Management Position in Local Government Authorities

Client	Tanzania Gender Networking Programme (TGNP MTANDAO)
Year	2019

Country	Tanzania
Details	An exercise to map female management position in local government authority in 24 district of Tanzania mainland. The assignment involves identifying the number of females compared to male that supervise units and departments in sampled LGA.
Role	Research Assistant - Review data collection questionnaire, script questionnaire in ODK, data cleaning and verification and data analysis.
Project	Azania Bank Ltd Employees Satisfaction and Engagement Survey
Client	Azania Bank
Year	2018
Country	Tanzania
Details	Assignment aimed to carry out an employee's Satisfaction and Engagement Survey for its staff. The objective is to obtain information useful to the Bank's drive to create a dynamic workforce as part of its strategy to transform itself into a customer-centric financial institution in Tanzania.
Role	Research Assistant - Review data collection questionnaire, script questionnaire in ODK, data cleaning and verification, and data analysis.
Project	Assessment of the Implementation of the Small and Medium Enterprise (SME) Policy (2003) to inform the formulation of the new SME Policy (2018/2919)
Client	UN-Women
Year	2018
Country	Tanzania
Details	The exercise aims to examine the challenges facing micro, small, medium and large enterprises among Women and people living with disabilities, identify the broad scale policy interventions that can address specific challenges faced by women and people living with disabilities, and to review interventions and implantations of the SME Policy 2003 at the local level and identify good practices and areas where the new policy needs to be strengthened in Tanzania.
Role	Research Assistant - Assigned to participate in the inception meetings, conduct desk review of the policy and literature review. Also, in instrument development, piloting and testing, translations and data management and assist in analysis and report writing.
Project	Independent Verification of Results and Review of the Education Programme for Results (EP4R)
Client	DFID
Year	2018-2020
Country	Tanzania
Details	Education Program for Results (EP4R) is a results-based financing instrument designed to achieve improved quality of education. OPM is conducting a verification exercise of the disbursement-linked results. This included data collection through a survey of 200 primary and secondary schools in 2016/17 and 520 schools for 2017/18 verification, acquiring data from secondary sources, 415 primary and 192 secondary schools for 2018/19 verification and conducting analysis.
Role	Data Manager & Analyst - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management, data management and data analysis.

Project	Mapping of School Capacity to Absorb Out of School Children in Zanzibar
Client	Zanzibar Ministry of Education and Vocational Training, Milele Zanzibar Foundation, UNICEF
Year	2017
Country	Zanzibar, Tanzania
Details	Mapping of school capacity to absorb out of school children in Zanzibar. The mapping exercise covers all the registered and unregistered pre-primary, primary, and secondary schools, both private and public, in Zanzibar. OPM will carry out quantitative data collection including a school identification exercise at the ward level to identify all schools, interviews with head teachers and interviews with alternative learning teachers.
Role	Data Manager - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	Evaluation of Nutrition Programme in Tanzania
Client	IFPRI, DFID
Year	2016-19
Country	Tanzania
Details	Baseline (2016) and Endline (2019) for mNutrition is a global initiative supported by DFID, organized by GSMA, and implemented by in-country mobile network operators (MNOs) to use mobile technology to improve the health and nutritional status of children and adults in the developing world. As part of a mixed-methods evaluation of the program, an endline survey was conducted with 2,800 households in Iringa region in Tanzania. The survey included an extensive anthropometric module and a behavioural game to measure time preference. It was conducted using Survey Solutions.
Role	Data Manager - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	EQUIP-T – Evaluation of Education Programme in Tanzania
Client	DFID
Year	2016-18
Country	Tanzania
Details	Midline (2016) and Endline (2018) survey for the mixed-methods impact evaluation of an education programme intervention in Tanzania. The survey visited 200 schools throughout the country, interviewed teachers, head teachers, and parents, conducted student learning assessment and teacher capacity tests, as well as classroom observations. Information from baseline was carried forward into the electronic questionnaires, and collected data was cross checked between all instruments. The survey was conducted using SurveyBe.
Role	Data Manager - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	Transparency for Development Project – Intervention Phase in Tanzania
Client	Transparency for Development (T4D)
Year	2016
Country	Tanzania

Details T4D project is to use evidence and local knowledge to design a transparency, accountability and participation intervention that could improve MNH and citizen empowerment, and use an integrated approach to evaluate the intervention and to build further evidence about whether these types of intervention work, why they work (or not), and in what contexts.

Role Data Manager - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Assessment of Tanzania Opinion over 2015 General Election**

Year 2015

Country Tanzania

Details A study involves mixed methodologies including phone survey that were applied to contain both qualitative and quantitative features.

Role Data Manager - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Farmer Income Survey**

Client Gatsby Charitable Foundation and the Department for International Development (DFID)

Year 2015

Country Tanzania

Details The 2015 Income survey, which followed a 2011 baseline survey and a 2014 Income survey, captures data on income differentials between the different contract farming arrangement.

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Impact Evaluation of Improving Rural Access in Tanzania**

Client DFID

Year 2015

Country Tanzania

Details DFID is seeking to improve the accessibility of rural communities by investing in repairing "bottlenecks" along selected rural roads. This was a baseline study of 1600 households before construction takes places using 5 case study roads to assess the socio-economic characteristics of those affected by the road improvements, as well as access to selected health, education and other services and agricultural markets. The survey also included 13 market price surveys of food and non-food items and qualitative data collection from 60 focus group discussions.

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Evaluation of Components of the MCC Energy Sector Project in Tanzania**

Client Mathematica

Year 2015

Country Tanzania

Details The short-term objectives of this project were to improve the quality and increase the quantity of electricity to enterprises and households in order to increase investment potential. The project evaluated the, Transmission and distribution systems rehabilitation and extension activity (T&D activity), the financing scheme initiative (FS initiative), and Kigoma Solar Activity

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Transparency for Development Project's - Baseline Household and Facility Surveys in Tanzania**

Client Transparency for Development (T4D)

Year 2015

Country Tanzania

Details T4D project is to use evidence and local knowledge to design a transparency, accountability and participation intervention that could improve MNH and citizen empowerment, and use an integrated approach to evaluate the intervention and to build further evidence about whether these types of intervention work, why they work (or not), and in what contexts.

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project Twaweza / AIID Follow-Up

Client Twaweza, AIID

Year 2015

Country Tanzania

Details A follow-up survey across 25 regions of Tanzania after their original 2011 collaboration with Amsterdam Institute of International Development (AIID) which involved a nationally-representative baseline survey of 2500 households throughout Tanzania on indicators related to citizen agency and government responsiveness in the education, health and water sectors as part of the evaluation of Twaweza's first strategic period (2009-2014).

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project Twaweza Kiufunza II

Client Twaweza East Africa

Year 2015

Country Tanzania

Details The Twaweza initiative are implementing two separate interventions that aim to improve the channelling of resources to public primary schools for quality improvement of public education, and the restricting of incentives to improve learning outcomes of primary school students. KiuFunza, involving sending of capitation grants directly to schools and paying teachers a bonus for performance. The program seeks to find effective means to improve learning outcomes in primary schools. The program involved 35 schools per district in 11 districts of mainland Tanzania.

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Experiments to Improve Learning Outcomes in Tanzania**

Client Twaweza

Year 2013-4

Country Tanzania

Details The Twaweza initiative implemented two interventions aimed to improve the channeling of resources to public primary schools and the restricting of incentives to improve learning outcomes of primary school students. As part of a RCT, base-, mid-, and endline surveys were conducted in 350 public primary schools across Tanzania. The survey interviewed teachers, head teachers, and parents, and conducted student learning assessment tests. Information from baseline was brought forward in the electronic instruments, and information was cross checked between all instruments and across the survey rounds. The survey was conducted using SurveyBe.

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **KNCU Community Health Insurance Fund Baseline Survey**

Client Amsterdam Institute of International Development (AIID) and Amsterdam Institute of Global Health Development (AIGHD)

Year 2013 & 2015

Country Tanzania

Details The study aims to quantify the impact of the project by comparing differences between treatment and control groups. Take-up is a key concern in micro-insurance and this study aims to study it by comparing farmers in treatment villages who did not purchase insurance to those that did. The study intends to make a contribution to the literature on micro-insurance as well as providing immediate feedback to the implementing partner of the KNCU Health Plan.

Role Data Manager - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Public Opinion Study of Natural Resource Management Revenues in Tanzania**

Client Centre for Global Development (CGD)

Year 2015

Country UK

Details To evaluate and test the ability of Tanzanian voters to formulate coherent views on a range of options for the use of natural gas revenues discovered in 2010 and other resources available.

Role Senior Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Survey Experiments to Measuring Household Labour in Smallholder Farming in Tanzania**

Client	World Bank
Year	2014
Country	Tanzania
Details	Survey experiment to quantify the measurement error in reporting household labor in agricultural surveys. Complex high frequency survey in rural Tanzania with weekly personal interviews for 216 households, weekly telephone interviews for 216 households, and an endline survey also including a control group of 216 households. Data collected in one week was cross checked and carried forward to the next week. Plot size was measured as part of the survey.
Role	Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	Tanzania Africa Rising Household and Community Baseline Survey
Client	US Agency for International Development (USAID)
Year	2014
Country	Tanzania
Details	The overall aim of the program is to transform agricultural systems through sustainable intensification projects in three regions of Africa. Baseline geo-coded household data was collected from 'baby' farmers in the intervention villages, with household survey data also collected from counterfactual villages. In addition to the household survey, a community survey was conducted using a short-structured community questionnaire from key informants and/or village leaders.
Role	Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	Geographically Concentrated Multi-Level HIV Prevention in Bukoba Urban District: Outcome Evaluation of a Combination Prevention Program for ICAP
Client	ICAP, CDC
Year	2014
Country	Tanzania
Details	In this survey, team interviewed over 5000 respondents in 2,500 Households. In addition, ICAP medical staff tested conducted rapid HIV tests on all consenting respondents. A Cohort of over 380 respondents who were newly diagnosed as being HIV positive were then re-interviewed within two weeks of the diagnosis and again 6 months later to track their experiences.
Role	Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
Project	Baseline Data Collection for Water Sector Impact Evaluation
Client	Millennium Challenge Account Tanzania (MCA-Tz) under Millennium Challenge Corporation (MCC)
Year	2013
Country	Tanzania
Details	One of MCA-Tz's short-term objectives is to reduce the incidence of water-related disease and increase time available for productive activities such as education. Data collection was conducted in both sites concurrently that involve a mixture of

quantitative and qualitative methods. Both phone survey and field site data were collected from 5008 households. Phone survey involved three rounds within three consecutive months.

Role Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Impact Evaluation of Tanzania Community Based Cash Transfer Project**

Client TASAF/World Bank

Year 2012

Country Tanzania

Details Follow up survey for the Impact Evaluation of the TASAF Conditional Cash Transfer project. The survey comprised 2,000 household interviews, and 100 school, health facility and community interviews. Data from baseline was brought forward into the electronic questionnaire form and cross-checked during interviews. The survey was conducted using SurveyBe.

Role Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Water and Sanitation Programme - Post - Intervention Data Collection and Analysis for The Impact Evaluation in Tanzania**

Client World Bank

Year 2012

Country Tanzania

Details Development and implementations of a post-intervention data collection and analysis for the impact evaluation of the Scaling up Sanitation and Hand-washing projects in Tanzania. The follow-up household survey was implemented in the 10 districts included in the baseline study, with a sample size of 3620 households, in a total of 181 wards and 362 Sole Consultant villages. Primary participants were mothers and caretakers of children under five years old.

Roles Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management

Project **Assessing the Impact of a Supplier Incentive on Coverage and Uptake of Subsidized ACTs in Remote Retail Shops in Tanzania.**

Client CHAI & ZLC

Year 2010-11

Country Tanzania

Details Baseline survey for a project to monitor and evaluate the Affordable Medicines Facility-malaria (AMFm) initiative. The survey comprised four instruments, including 2 retail audit instruments, exit interviews and a household questionnaire. The survey was conducted using SurveyBe.

Role Data Processing Officer - Instrument development, piloting and testing, translations, development and delivery of training, field data collection protocol management and data management
